**Glacial Lake Missoula And Its Humongous Floods**

**GLACIAL LAKE MISSOULA - Home**

Glacial Lake Missoula formed as the Cordillera Ice Sheet dammed the Clark Fork River just as it entered Montana that existed periodically at the end of the last ice age between 15,000 and 12,000 years ago. The lake measured about 7.74 square kilometers (2,000 sq mi) and contained about 2,185 cubic kilometers (500 cu mi) of water, half the volume of Lake Michigan. The Glacial Lake Missoula National Landmark is...

**Glacial lake outburst flood - Wikipedia**

A glacial lake outburst flood (GLOF) is a type of outburst flood caused by the failure of a dam containing a glacial lake. An event similar to a GLOF, when a body of water contained by a glacier melts or overtops the glacier, is called a jökulhlaup. The dam can consist of glacier ice or a terminal moraine. Failure can happen due to erosion, a building of water pressure, an avalanche...

**Channeled Scablands - The Seven Wonders of Washington State**

Once Glacial Lake Missoula drained and the flood stopped, the ice and sand finally formed again and the glacial lake was re-created. Eventually, the ice dam gradually formed again and the glacial lake was re-created. Eventually, theice dam gradually formed again and the glacial lake was re-created.

**So much for a tidy finish to the Western AA football season. Butte’s home loss to Helena Capital last week was less shocking for it being the Bulldogs’ first league loss than it was for the final...**

**Lake Cowichan Kraken make history with first wins**

The kraken of legend took many a pirate ship down to Davy Jones's Locker, and the Vancouver Island Junior Hockey League's Lake Cowichan Kraken followed that tradition last Friday as they sank the...
